

Covid-19 behaviours in Brazil

► Report

Insights and trends in people's behaviours related to COVID-19. Brought to you by a team of health and behavioural experts at the Institute of Global Health Innovation (IGHI) at Imperial College London and YouGov. These reports are created on a regular basis, following new survey results.

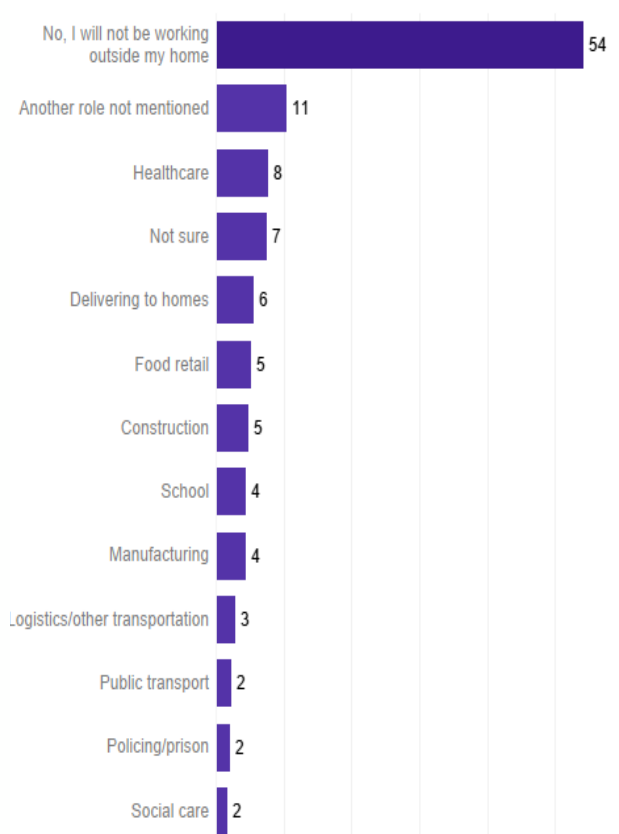

How are people in Brazil responding?

As of April 5th 2020

This report looks at insights from Brazil covering March 30th through April 5th

Thinking about the next 7 days... will you be working outside your home in one of the following roles? Mark all that apply (%)

78%

78% of people in Brazil are staying home or only leaving the house once a day

54%

54% of people in Brazil are not planning on working outside the home the following week

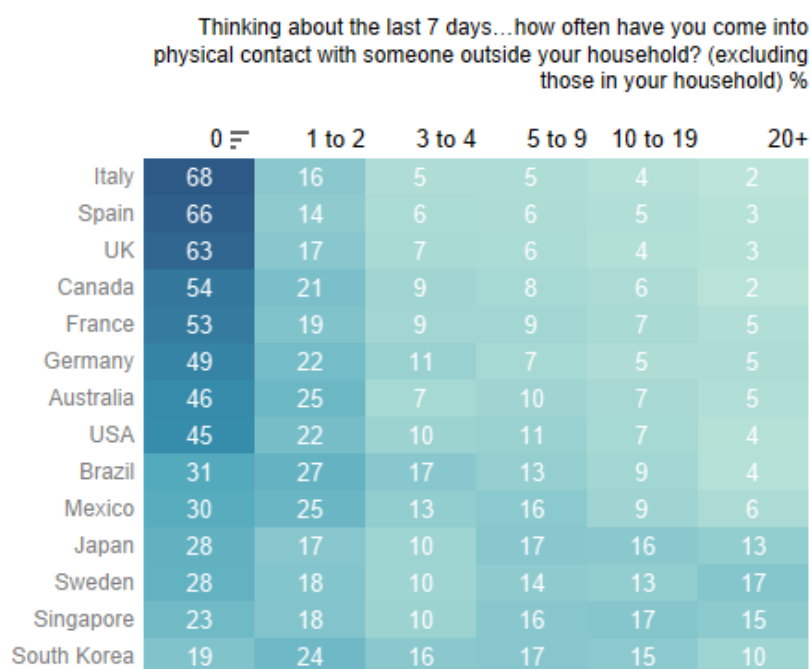

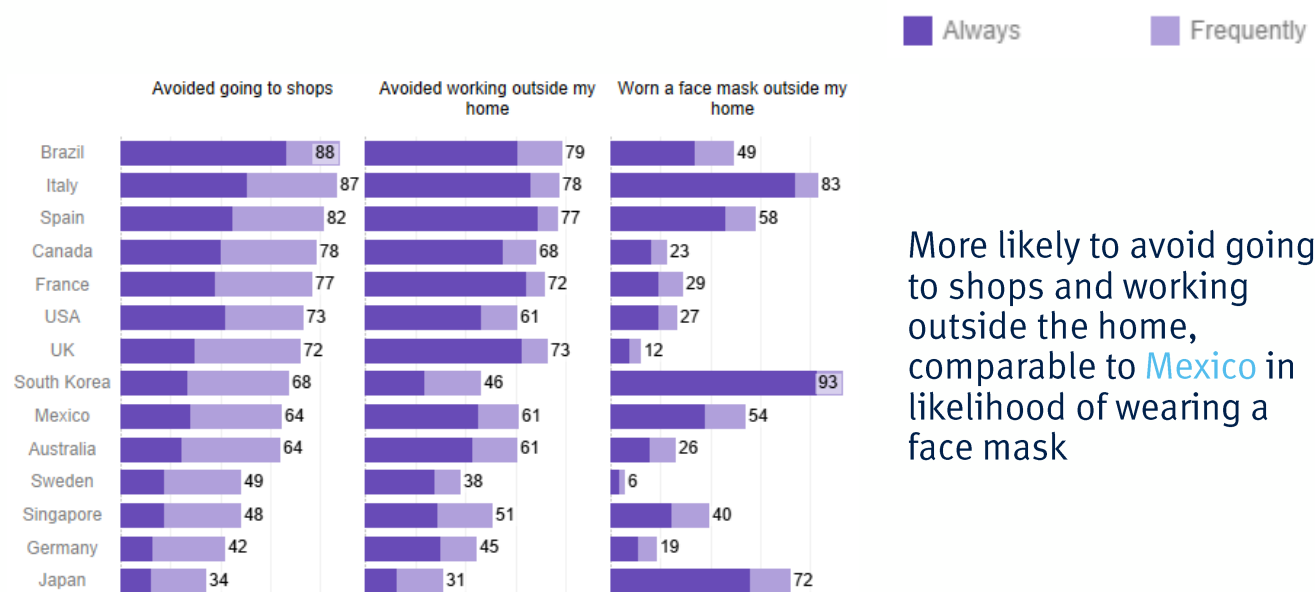

Of those that do work outside the home, 11% report working in **another role not mentioned** and 8% report working in **healthcare**

How does **Brazil's** behaviour compare to other countries?

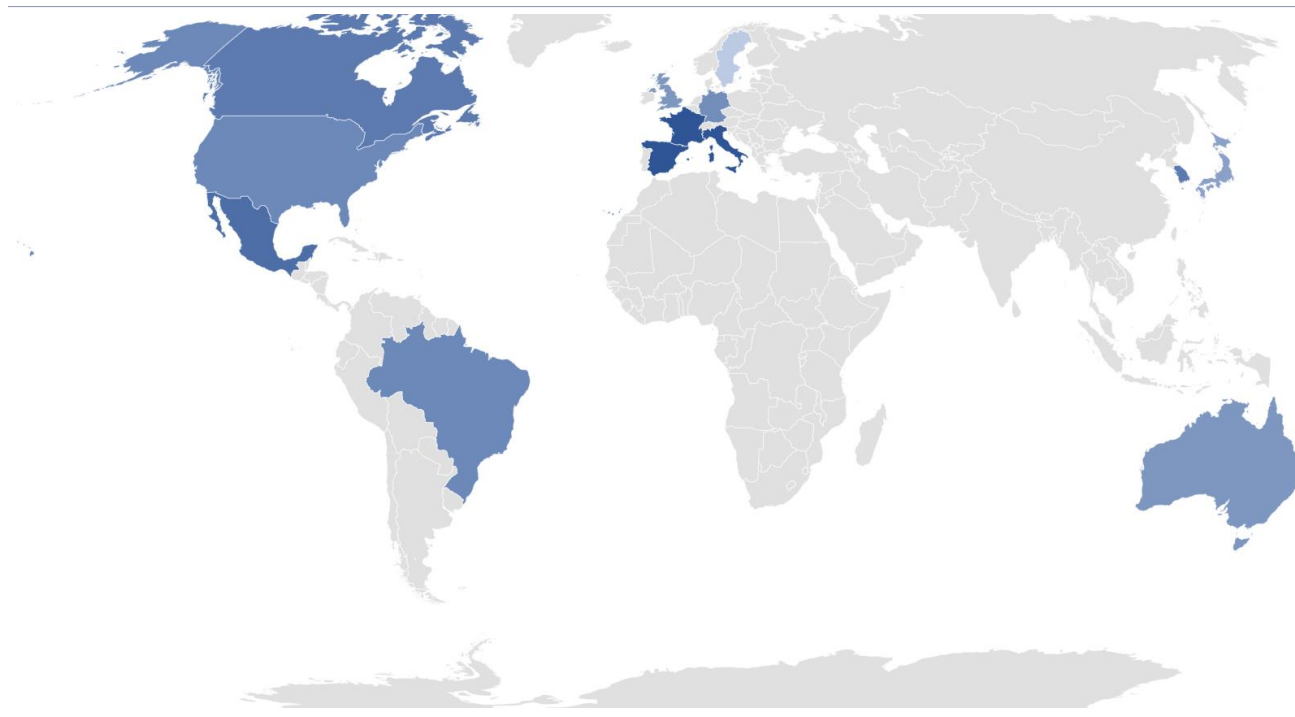

Compared to other countries surveyed the same week (March 30th through April 5th) respondents in Brazil were...

How stringent is the **Brazilian** government compared to its peers?

The University of Oxford's Stringency Index is a measure of the number and strictness of government policies in response to the Covid-19 outbreak. Stringency Index range is from 0 - 100. Numbers below are for April 5th.

Darker shades in the map below are indicative of higher stringency indices

| | | | | | | |

For more behavioural data on a global level, visit coviddatahub.com to explore our interactive charts

The [CovidDataHub.com](https://coviddatahub.com) project is a joint collaboration between the Institute of Global Health Innovation (IGHI) at Imperial College London and YouGov Plc to gather global insights on people's behaviors and life satisfaction in response to COVID-19. The research covers 29 countries and surveys are conducted on a regular basis since the first week of April.

This report is designed to provide insights on how different populations are responding to the pandemic, helping public health bodies in their efforts to limit the impact of the disease. Anonymized respondent level data is generously made available for all public health and academic institutions globally by YouGov Plc at our [GitHub site](#).
